

Is Your Home Energy Efficient?

Use this simple checklist below to see if a home energy assessment is right for you.

For additional energy saving tips, or to learn more about a Home Energy SolutionsSM,

Call 877-WISE-USE or visit hesui.energizeCT.com

- You have double paned windows.
- There is no air coming in around your exterior doors or windows.
- There is no air coming in around wall outlets and switch plates.
- Your attic is insulated.
- Your water heater is less than 10 years old.
- Your central air system is less than 10 years old.
- Your heating system is less than 15 years old.
- The holes around your bathroom and kitchen sink pipes are sealed.
- The majority of light bulbs in your home are LEDs.
- You feel comfortable in your home year round.

Total - If your total is 8 or below you should have a Home Energy Solutions service

How does your home check out?
